

SKIN TREATMENT FOR HYPERPIGMENTATION

Welcome to Restore Pharmaceuticals. Our mission is to continuously research and prepare the most effective and safe products for our patients to maximize results. Our highly trained staff will prepare your prescription according to your doctor's specifications using the highest quality ingredients.

HOW IT WORKS

Hyperpigmentation creams work to reduce the appearance of dark spots, uneven skin tone and discolouration caused by factors such as sun exposure, hormonal changes, aging or scarring. With regular use you can expect these creams to gradually lighten the affected areas resulting in a more even complexion and improved skin tone. It is important to follow the usage instructions carefully and be patient as results may vary depending on the severity of the hyperpigmentation and individual skin types.

DIRECTIONS FOR USE

1. Apply a **thin layer** to the affected areas at bedtime.
2. Your skin may become more sensitive to sunlight. Apply SPF 50+ sunscreen daily while using your medication and avoid direct, prolonged exposure to sunlight.
3. The medication may be drying. Start by applying the medication two times per week, then three times per week, increasing by one day per week until you have built up to once daily usage.
4. This medication may take up to **90 days** for maximum effect. If you experience redness, irritation or peeling use gradually.

SIDE EFFECTS

As with any medication there may be the chance of allergies or intolerance. Stop using and contact your physician or our pharmacy if you experience any of the following: rash, itching or irritation at the applied site, or any other change in medical status.

STORAGE

Store your medication in a cool and dry place away from heat and moisture.

Thank you for allowing Restore Pharmaceuticals to be part of your healthcare solution. For any other questions please reach us at: info@restorepharmaceuticals.ca or visit us at: www.restorepharmaceuticals.com
